The aim of this research was to find out whether or not there was any effect of PWIM in teaching writing of descriptive text. This research was conducted in SMP Muhammadiyah 1 Purwokerto in academic year 2017/2018. This research used quasi experimental research. There were two groups of which class VIIE was used as a control group and VIIF was used as the experimental group. This research used purposive sampling to determine the sample. Test was used in collecting data of this research, namely pre-test and post-test. The test was distributed to both groups. After that, the data was analyzed using t-test to know the effectiveness of PWIM. Based on the computation, t-test result was 2.11 and the result of t-table at the significance level 0.05 with degree of freedom 36 was 1.68, so the calculation of t-test was higher than t-table (2.11>1.68). It could be concluded that PWIM was effective for teaching writing of descriptive text at seventh grade students of SMP Muhammadiyah 1 Purwokerto in academic year 2017/2018.
