CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

The researcher concluded that the second semester students of Muhammadiyah University of Purwokerto employed all of the strategies in learning vocabulary. The students used determination, social, memory, cognitive, and metacognitive strategy as the way to learn vocabulary. Beside that the dominant strategy used by the second semester students was metacognitive strategy. This strategy consist of listen to English songs and news, memorize word from English magazines, review my own English vocabulary cards for reviewing before the next lesson starts, continue to study vocabulary overtime, and use on-line exercise to test their vocabulary knowledge.

B. Suggestion

1. To the lecture
   a. After knowing the strategies used by the students, the lecture may choose the appropriate way in learning vocabulary based on the students strategy.
   b. To be able to give motivation to their students so they will learn English seriously.
2. To the students

The students are more active during the teaching learning process in the class, and they should choose the best strategy to learn vocabulary, so they can achieve the success of English class.
