FOREWORD

Allah SWT deserves initial praise due to His grace and gift of life to me. When the doors seemed completely closed, He opened this window of opportunity for me to further my studies overseas. I attribute to Almighty Alhah my successful completion of my thesis. It was mandatory for one to write a thesis to fulfill the requirements for the award of Master of Management degree in the Master of Management Study Program of the Postgraduate Program of the Faculty of Economics and Business, University of Muhammadiyah Purwokerto.

There have been outstanding academic support, guidance and mentorship in the process towards attainment of this thesis. This thesis owes its realization to the following:

- (1) The Dean of the Faculty of Economics and Business who has proven to be very instrumental in the provision of academic advice for the thesis.
- (2) Head of the Master of Management Study Program who has provided various information and guidance regarding the management of thesis preparation.
- (3) Assoc. Prof. Dr. Naelati Tubastuvi, SE,M.Si, my Supervisor, for his tireless and selfless tutelage from initial to ultimate final step of this thesis. He has opened my third eye into the world of academic writing.
- (4) Herni Justiana Astuti, SE, M.Sc., Ph.D, as one of my lecturers and thesis examiner, she equipped me with the prerequisite knowledge for management.
- (5) My family members who have provided material and moral support; as well as to crown it all, Allah SWT, the owner of generosity, should compensate our lecturers whose efforts were kindly channeled towards this thesis. It is my sincere conviction this thesis is worthwhile in the enhancement in the field of science.

ABSTRACT

This study aimed to determine the impact of information technology on improving the organizational performance of Jannat Hunt Oil Exploration and Production Company in the Republic of Yemen and Pertamina Company in the Republic of Indonesia, and we were to determine the level of information technology and the level of improving organizational performance in the companies, and to achieve this, the study used the descriptive analytical approach, in the study of the community represented by all employees of the company Jannah Hunt, whose number is (202) workers, and some employees the company Pertamina whose number is (70) employees, and after data was collected from them, many statistical methods were used to analyze the data and test the study hypotheses. The most important result of the study is that there is a strong positive effect of information technology on improving organizational performance at Jannah Hunt Company and Pertamina Company the more information technology is used, the greater the improvement of organizational performance in Jannah Hunt Company and Pertamina Company, and the study also found that there are statistically significant differences in the response The study sample about the level of information technology is attributed to the variables of gender and job position, while no differences appeared due to the educational level variable. Horsepower is attributed to the gender variable and the job position variable, and based on the results reached, the study recommended more attention to information technology in its six dimensions by Janna Hunt and keeping up with everything new in information technology, because it significantly improves organizational performance, As well as the need for more attention to the human resource and the provision of the latest software in the world of information technology, to achieve further improvement in the organizational performance of the Janna Hunt Oil Exploration and Production Company in the Republic of Yemen and Pertamina Company in the Republic of Indonesia.
