ABSTRACT

THE EFFECTIVENESS OF WARMING-UP FOR READING(WFR) FOR TEACHING READING

**(An Experimental Research at the Eight Grade Students of SMP

The aim of this research was to find out the effectiveness of Warming-up For Reading (WFR) for teaching reading at the Eight Grade students of SMP Muhammadiyah 2 Purwokerto in the Academic Year 2015/ 2016. This research was conducted by using quasi experimental research. The participants of this research were the Eight Grade students of SMP Muhammadiyah 2 Purwokerto. There were two classes who participated in this research; class C as the control class and class D as the experimental class. Pre-test and post-test were used in collecting the data. The test consist of multiple choice items. Based on the computation, t-test result was 0.864 and the result of t-table at the significant level 0.05 with degree of freedom 48 was 0.281. The calculation of t-obtained with t-table was concluded that t-obtained was higher than t-table ($0.864 > 0.281$). In short, the hypothesis is accepted which meant that Warming-up For Reading(WFR) was effective for teaching reading at the Eight Grade students of SMP Muhammadiyah 2 Purwokerto in the Academic Year 2015/ 2016.
